

South Africa - Witwatersrand Goldfields 1910

The map covers the Witwatersrand goldfields of South Africa. A.J. Clevely published a 70" by 30" map of the goldfields in 1909 (see Bulletin of the American Geographical Society, Vol. 42, No. 10 (1910)). For sale here is the photo reduction of that map, also published by A.J. Clevely. The map measures 56cm x 23cm. The main map runs the full width of the map, with an insert for the area South West of Randfontein and another insert for the area South West of the Nigel mines. It shows the ground stopped areas, shafts, boreholes, railways and farms in the area. Good condition. M0079.
